

The aim of City Composting LTD. is to provide the Dublin City community a means of disposing bio-waste in an ethical and responsible manner. Thereby reducing the quantities of waste going to landfill and lowering the general carbon footprint of the city.

We pick up the bio-waste from a restaurant or a cafe via bike and cart bringing it to the depot to sort through and break it down using good old fashioned worms. Then when the compost is ready we sell it on to local gardeners. Thereby growing food from you food waste!!!
